

AMENDMENTS TO THE CLAIMS

Claims 1-18 (Canceled)

19. (Currently Amended) A portable telephone set comprising:  
talking means; [[and]]  
music replay means, for superposing a talking voice of telephone communication on  
replayed music in the process of music replay by said music replay means when making said  
telephone communication through said talking means during said music replay by said music  
replay means; and  
volume control means for controlling the volume of said replayed music and the volume  
of said talking voice of the telephone communication.

20. (Original) The portable telephone set according to claim 19, further comprising:  
telephone number storage means storing a telephone number,  
for superposing said talking voice of said telephone communication on said replayed  
music in the process of said music replay by said music replay means when making said  
telephone communication with said telephone number stored in said telephone number storage  
means.

21. (Original) The portable telephone set according to claim 19,  
capable of arbitrarily setting the volume of said talking voice of said telephone  
communication and the volume of said replayed music in the process of said music replay.

22. (Original) The portable telephone set according to claim 20,  
capable of arbitrarily setting the volume of said talking voice of said telephone  
communication and the volume of said replayed music in the process of said music replay in  
correspondence to said telephone number stored in said telephone number storage means.

23. (Withdrawn) A portable telephone set comprising:  
talking means; and  
music replay means,  
for replaying music corresponding to an interruption call from a third party by said music  
replay means when receiving said interruption call during telephone communication through said  
talking means and superposing replayed said music on a talking voice of said telephone  
communication.

24. (Withdrawn) The portable telephone set according to claim 23, further comprising:  
volume control means controlling the volume of said replayed music and the volume of  
said talking voice of said telephone communication, wherein  
said volume control means reduces the volume of said talking voice of said telephone  
communication when superposing said replayed music corresponding to said interruption call on  
said talking voice of said telephone communication.

25. (Withdrawn) The portable telephone set according to claim 23, further comprising:  
volume control means controlling the volume of said replayed music and the volume of  
said talking voice of said telephone communication,

for superposing said replayed music corresponding to said interruption call on said talking voice of said telephone communication while reducing the volume of said replayed music by said volume control means during continuation of a connection state between three persons including talkers and a waiting person when answering to said interruption call from said third party.

26. (New) The portable telephone set according to claim 19, wherein said volume control means reduces the volume of said replayed music when superposing the talking voice of the telephone communication on the replayed music in the process of music replay.
